## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|
| <b>Pipex.Ai</b><br><i>Backend Developer</i><br>Developed backend services for a B2B industrial marketplace focused on sourcing industrial materials, supporting RFQs, supplier discovery, and procurement workflows. <ul style="list-style-type: none"><li>Developed and maintained backend services across SaaS, admin, and asynchronous worker service repositories.</li><li>Contributed to CI/CD pipeline development, resolved critical security vulnerabilities, and optimized build workflows, reducing development build times by 70%.</li><li>Improved API performance by 4–6x through SQL query optimization, caching strategies, and efficient service design.</li></ul> | <b>Sep. 2025 – Present</b><br><i>Mumbai, Maharashtra</i>   |
| <b>Rthetapi</b><br><i>Full Stack Development Intern</i> <ul style="list-style-type: none"><li>Developed modular full-stack web applications using React, Node.js, and NestJS, implementing microservices-based APIs with PostgreSQL for scalable backend architecture.</li><li>Designed and implemented REST APIs and reusable components, collaborating with cross-functional teams to enhance system usability and maintainability.</li></ul>                                                                                                                                                                                                                                    | <b>Nov. 2024 – Apr. 2025</b><br><i>Remote</i>              |
| <b>AltissAdvance Tech Pvt. Ltd.</b><br><i>Frontend Development Intern</i> <ul style="list-style-type: none"><li>Developed UI components for a React-based SaaS platform, improving page responsiveness and load performance.</li><li>Translated design mockups into production-ready code while ensuring consistent UI/UX and component reusability.</li></ul>                                                                                                                                                                                                                                                                                                                     | <b>Nov. 2023 – Feb. 2024</b><br><i>Mumbai, Maharashtra</i> |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>StudentHub – Student Social Platform</b> <ul style="list-style-type: none"><li>Engineered a scalable student social platform enabling communities, post sharing, threaded discussions, and real-time messaging using a microservices-based backend architecture with distributed processing.</li><li>Implemented microservices using AWS Lambda, integrating S3 for media storage and WebSockets/WebPush for real-time notifications, ensuring low-latency event delivery and scalable serverless compute.</li><li>Designed asynchronous background processing pipelines using Redis and BullMQ, supporting recommendations, notification delivery, and analytics workloads with reliable job queues, retries, and distributed worker processing.</li></ul> |
| <b>E-Commerce Platform</b> <ul style="list-style-type: none"><li>Developed a responsive e-commerce app with secure authentication and payment integration.</li><li>Designed and implemented modular APIs and UI components with full CRUD support for users, products, and orders.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## SKILLS

|                                                                                                                                |
|--------------------------------------------------------------------------------------------------------------------------------|
| <b>Backend:</b> Java, Spring Boot, Node.js, Express.js, NestJS, TypeScript, Spring MVC, Spring Data JPA, WebSockets, REST APIs |
| <b>Databases &amp; Messaging:</b> PostgreSQL, MongoDB, Redis, RabbitMQ, BullMQ, Caching, Message Queues                        |
| <b>Cloud &amp; Infrastructure:</b> AWS (Lambda, S3, EC2), Docker, Microservices Architecture, CI/CD Pipelines                  |
| <b>DevOps &amp; Tools:</b> Git, GitHub, Jenkins, Gitlab, Linux                                                                 |
| <b>Frontend:</b> React, Redux, Tailwind CSS, Ant Design, Bootstrap                                                             |
